Benchmark Revenue Management closes successful \$1.8 Million Pre-Series A financing

March 31, 2008

Benchmark Revenue Management has secured financing led by Express Ventures of San Diego to form a \$1.8 million round. The funding will enable Benchmark to bring its breakthrough revenue cycle tools to hospitals throughout the U.S. Benchmark will be increasing its Sales and Marketing presence and will leverage the success of current installations in key U.S. hospitals.

"We are excited about this investment because we have seen how Benchmark's unique technology can provide clear and immediate ROI to hospitals. Benchmark will invest these funds in part to help get the word out to more hospitals that there is a new and sustainable solution to their growing receivables issues", said Marco Thompson, a Managing Director of Express Ventures.

Benchmark Revenue Management, provides revenue decision support and workflow management to enable healthcare providers to identify financial opportunities, track performance and improve net income and cash flow. Benchmark offers an advanced web-based technology application that works in conjunction with a client's existing information system to retrieve and analyze pertinent revenue cycle data and produce reports that identify areas of financial opportunity within the client's revenue cycle.

"In today's difficult economic environment, hospitals are working harder and smarter to collect monies they have already earned.", stated Tyson McDowell, CEO of Benchmark Revenue Management. "Our solutions provide hospitals with tighter accountability, reduced variability and better information management without further investments in new technologies. We are pleased to now have the resources to bring this solution to more hospitals across the US."
